

Elizabeth Iember Muehlich

Origin Systems Architect - Project delivery systems for regenerative trade

What I deliver

Carbon project delivery, MRV design, ESG and ESRS evidence packs, regenerative agriculture design, capital stack support, and field-to-market traceability. Built from field experience in Rwanda, Ghana, and Nigeria; designed to replicate.

How I work

- Field-flexible: based in EU and Switzerland, on the ground across Africa on agreed cycles.
- Evidence first: every claim linked to a source or labelled provisional.
- Consent first: no people-identifying media without recorded consent.
- Four-eyes review on material data before publication.

Frameworks I use

Carbon accounting flow, soil carbon logic, regenerative agriculture models, coffee agroforestry diagrams, MRV thinking structures, ecosystem service models, stakeholder maps, climate-risk frameworks, field-to-market traceability, implementation roadmaps, landscape restoration, biochar circularity.

Regions

Coordination from: EU, Switzerland, Rwanda (rotating).

Field visits to: Rwanda, Kenya, Ghana, Tanzania, Uganda, Nigeria, Zimbabwe, and client sites in DACH, EU, Nordics, UK, North America.

Selected work

Project	Role	Outcome
Rwanda Origin Pilot	Architect & operator	Origin roasting with female-led co-op partners; farmer evidence capture.
Ghana Papaya Pilot	Concept designer	Phased value-chain concept and equipment plan.
FarmAI Solar Suite	Founder, MBA thesis	Solar irrigation, predictive analytics, farmer dashboards.
Beyond Fair Organics	Operating company	Commercial entity executing origin-based regenerative value chains.
Iember Studio	Architecture practice	Operations, evidence, and capital layer integration.

Credentials

MSc Project Management - BA International Relations - BA Human Resources - MBA candidate (FarmAI Solar Suite thesis) - ESRS E1 and GHG Protocol working knowledge.
